El-Fayoum/Egypt ■ ahmadfathydev@gmail.com

Full Stack Developer

Summary

My name is Ahmad Fathy, I was born in 1997. I started learning web development in 2016, now I am a full stack developer using JAVASCRIPT in front end and back end.

Education

El-Fayoum University

2016-2020: specific education college - educational technology department.
During my study in the college my love to web development forced me to make useful things:

TECHNO EGABY: I made it with my friend to raise the awareness against corona viruse.

ICC: my graduation project that helps people to know the inner components of the computer by giving them interactive 3D objects attached to some information about the components.

Skills

Fluent: Html, Css, JavaScript, Vue.js/Vuex/Nuxt, Ajax.

Intermediate: Jquery, Bootstrap, Sass, Pug, ejs, Node.js/Express, MongoDB/Mongoose, canvas, SVG, git/github, three.js, p5.js, React/redux.

Familiar with: Php, Mysql, C++, Visual basic, nativescript, electronjs.

In process: GraphQL

Side Projects

Genuine: Ecommerce website.

Habshtakanat: blog website.

Work Experience

Freelancer: 2020-now
