SUMMARY

- I am a full stack web developer enjoying what I am doing and a learning addict.
- I started learning web development in 2016 by learning front-end.
- And I fell in love with it so I could not stop myself from studying back end too.
- Now I am a full stack web developer using JAVASCRIPT in almost all of my works.
- Recently I write some articles about web development on [my blog](#).

EDUCATION

Specific Education College	Education Technology Department	El-Fayoum University
----------------------------	---------------------------------	----------------------

2016–2020: While studying at college I was aiming to be the first in my department and beside this goal I was hoping to be a web developer, So I was studying web development (self-study) beside the academic study.

July 2020: I graduated and I earned the **FRIST** place in my department and the **SECOND** place in my college with **GPA** : 3.675. And I got an **A+** in my graduation project.

SKILLS

Fluent: Html, Css, JavaScript, Vue.js, Vuex, Ajax.

Intermediate: Jquery, Nuxt, Bootstrap, Sass, Pug, Ejs, Node.js/Express, MongoDB/Mongoose, Canvas, SVG, Git/Github, Three.js, P5.js, Socket.io.

Familiar with: React, Php, Mysql, C++, Visual Basic, NativeScript, Electron.

In process: GraphQL.

STUDENT ACTIVITIES

TECHNO EGABY: I made it with my friend when I was in college for initiative called “Techno Egaby” to raise the awareness against corona viruse. *(php, mysql, bootstrap, js, ajax)*.

Code: <https://github.com/ahmadfathy97/Techno-Egaby>

PROJECTS

- **ICC:** My graduation project that helps people to know the inner components of the computer by giving them interactive 3D objects attached to some information about the components. *(three.js, electron, html, css)*.

Code: <https://github.com/ahmadfathy97/icc>

- **Habshtakanat:** Is a blog website you can Share your experiences with your followers and get some feedback about it, And learn new things in different fields from the people you are following. *(Express, Mongodb, Vue.js, ajax, Bootstrap)*.

API code: <https://github.com/ahmadfathy97/api>

Front End Code: <https://github.com/ahmadfathy97/using-my-api-with-vue>

- **Genuine:** This project is an Ecommerce website. *(Express, Mongodb, Ejs, Bootstrap, Paypal-SDK)*.
- **10-js-projects:** I love to challenge myself so I decided to make 10 projects with different technologies as I could. *(Chartjs, Electron, Threejs, Vue.js, Express, Mongodb, Socket.io, NativeScript, Face-API, P5.js)*.
- **Arabic2franko:** This project is a package that converts arabic to franko.

Code: <https://github.com/ahmadfathy97/arabic2franko>

WORK EXPERIENCE

JUN 2020 – MAY 2021: Full stack developer – Freelancer.

- I built some front end projects like [برائل بالمصري](#) using html, css, JS, bootstrap, and ResponsiveVoice API.
- I built some full stack projects like “MI FINANCE” using express.js, postgresql, pug.js and.
- I built some APIs and fixed some issues in websites.

MAY 2021 – AUG 2021: Front end developer at SSD company

- Using vue.js framework and some plugins I helped build care website and its dashboard.
- helped my co-workers to develop their skills in vue.js.
